

Turn down this petition and save ordinary people a lot of headaches. Phone companies have never been helpful to me with the internet and are a general hassle because local companies have your business because of the assigned areas. Besides that I am on the board of a local non-profit and our most recent Verizon bill had about \$20 worth of ISP charges and we do not even own a computer!!! Please save ordinary people a lot of headaches. Phone companies are enough of a pain as is.
